To anyone dealing with Tom Winton:

Please let this letter serve as my full endorsement of Tom. Over the several years that I have dealt with Tom I have found him to have a number of qualities that are tough to find these days in anyone especially the computer tech industry. The overall traits anyone looks for are there: Honesty, hardworking, loyal and smart.

Tom has provided exceptional technical support to me from simple computer repair to web page animation projects. He has always responded in a professional and timely manner bringing a high-level of computer savvy to my projects.

I could go on about Tom, but suffice it to say that he is very good at what he does and an asset to anyone.

Sincerely,

Debby Keseric
