

My husband & I met Tom a couple of years ago when we purchased our first computer - an Apple MacBook Pro. We are senior citizens & even though we went to computer classes, remained mostly computer illiterate.

Thanks to Tom, he set up our computer to our specifications, walked us gently through our questions, & was always available for any problems that we ran into. Due to his patience & knowledge, we are now more compatible & comfortable with our computer.

Tom Winton will be a dedicated & worthwhile asset to any company that hires him.

Sincerely,

James & Elizabeth Mc Intyre
