Re: Letter of Recommendation

Over the past several years we have had the opportunity and pleasure to work with Tom (Adam Thomas Winton) on various web based projects ranging from design features, navigation and back room administration. Tom has always provided the service and technical expertise needed to help make our website development an exceptional event.

Additionally, Tom is a very sincere and dedicated professional that would easily be a welcomed addition to any technical team working toward the Corporate Goal.

Best personal regards,

Scott Chalmers
President
