

This is a letter of recommendation to Digital Domain toward the employment of Mr. Tom Winton.

Mr. Winton has been my right hand in anything to do with my MAC computers. I came to Florida 10 years ago as the owner of a small advertising agency and my needs continually changed but I was helped along by Mr. Winton. His on hands computer knowledge is outstanding and his teaching skills of new software is excellent. Tom's caring service was always delivered promptly, knowledgeably and with a smile. My partner is a PC user and we considered it very lucky to have one man service us with the complete knowledge of both. His caring honesty is his other asset. He will fix a problem over the internet and will always charge a fair amount for his service. He guarantees his work no matter how complicated. He is a true professional and just one great guy. You will be lucky to have him.
